

CSE2101

Graded Tutorial 3

Type: Group

The semester project for CSE2101 required 6 submissions inclusive submission 0. Each member of the 16 project groups are required to update [this GitHub repository](#) by submitting a section of the project document to a created group folder in the CS repository.

Specifically, each group is required to:

- Create a folder named: **Group# XX** and commit same to the repository1
- Each group member will commit a project submission file to this folder.

You are required to use meaningful commit messages that describes the change you made to the file.
